

BED BUGS = CAN'T = BEAT THE HEAT

Bed Bugs Multiply at Top Speed

A bed bug egg becomes a mature adult in just 45 days

1 Bed Bug lays 200-500 eggs in their lifetime

Your house will become fully infested within 3 months from when the first bug entered your home

Where do bedbugs come from?

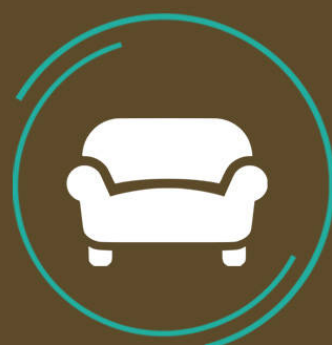

SUITCASE AND BAGS

Bed bugs can hitch-hike home on suitcases and backpacks.

HOTELS

They can travel home on your clothing from hotels and motels.

SECOND HAND STORES

Bed Bugs can come on used furniture, clothing and even wheelchairs.

How can you get rid of bed bugs?

PESTICIDES : Pesticide treatments are very effective way of controlling bed bugs

VACUUM : Vacuum your floors, suitcases and all belongings

DRYER : Dry all infested cloth items on the highest heat for 30 minutes

BED ENCASEMENTS : Encase your mattress and pillows with bed bug stop cover

INTERCEPTION DEVICES : Place interception devices near your beds legs

DO YOU NEED TO THROW AWAY YOUR BED LINENS IN ORDER TO GET RID OF A BED BUG INFESTATION?

Don't waste your money and throw linen away!

Put them in your dryer on the highest heat for 30 minutes that should kill all the bugs and eggs.
